SUBJECT INDEX

acetylcholine release - and grafting of cells, 543
- effect of cutaneous mechanical sensory stimulation, 423
- sensory stimulation, 423
acetylcholine transport - effect of vesamicol, 83
- into synaptic vesicles, 83
acetylcholine - concentrations in cortex, 544
- in hippocampus following ischaemia, 243
acetylcholinesterase activity - in endothelial cells, 129
- influenced by glial cells, 129
acetylcholinesterase - effect of denervation, 415
- in muscles, 415
- molecular forms, 381, 415
- in Alzheimer's disease and embryonic development, 381
acid fibroblast growth factor - delays ischemia-induced intracellular calcium elevation, 337
- possible involvement in neuroprotection, 337
- prevents cell death, 397
acyltransferase activity - in squid axoplasm, 563
ADP - and rise in intracellular Ca^{++}, 75
adrenal chromaffin cells - catecholamine release, 259
adrenal medulla - aminopeptidase P, 203
age-related phosphatidic and polyphosphoinositide formation, 223
alcohols - differential effect on synthesis of metallothionein, 555
Alzheimer's disease - acetylcholinesterase and butyrylcholinesterase levels, 381
- prostaglandin synthesis, 197
amino acids - in hippocampus following ischemia, 243
aminopeptidase P - in bovine adrenal medulla, 203
anistoropy, 7
aromatic L-amino acid decarboxylase - cloned, 275
- expression in oocytes, 275
astrocytes - bradykinin receptors, 573
- secrete nerve growth-factor-like molecules, 455
autoradiographical - localisation of NPY receptors, 45
autoradiography - of ^{3}H-QNB binding, 313

binding - of ^{3}H-QNB, 313
blood/brain barrier - transfer of tryptophan, 513
- transport of α-methyl-L-tryptophan, 513
bradykinin receptors - on astrocytes, 573
- activation of protein kinase C, 573
bradykinin - effects in D34 astrocytoma cells, 209
- induces phosphoinositide turnover, 573
- inhibits cAMP, 209
brain damage - effect of Trimethyltin, 351
brain polysome-cytomatrix complexes, 21
[^{35}S]t-butylbicyclophosphorothionate binding - in house flies, 215
butylcholinesterase - molecular forms, 381
butyrylcholinesterase - in Alzheimer's disease and embryonic development, 381

calcium channel blockers - effect on dopamine release, 99
calcium elevation - in ischaemia, 337
calcium entry - and muscarinic receptors, 259
calcium ionophores - potentiate endothelin-induced stimulation of inositol phosphate, 243
calcium mobilisation - and muscarinic receptors, 259
calcium -measurement of intracellular levels, 75
calcium/calmodulin dependent protein kinase 11 - regulation and roles, 469
cAMP - in D384 astrocytoma cells, 209
- inhibition by bradykinin, 209

catecholamine release - from chromaffin cells, 259
- muscarinic receptor-induced, 259
cell death - prevented by aFGF, 397
cerebral ischemia - effect on acetylcholine and amino acids, 243
cGMP - in D384 astrocytoma cells, 209
chloramphenicol acetyltransferase assay - neuropeptide Y fusion plasmids, 185
choline uptake - effect of ginsenoside Rb_1, 1
cholinergic markers - effect of kainic acid, 447
cholinergic neurones - revealed by choline-o-acetyl transferase immunocytochemistry, 429
- revealed by in situ hybridization, 429
cholinergic receptors - binding studies, 313
cholinergic receptors - in somatosensory cortex, 313
choline-o-acetylcholinesterase immunohistochemistry - of cholinergic neurones, 429
circadian rhythms - of membrane anistoropy, 7
cocaine - influence on dopamine uptake, 521
cortex - release of 5-HT, 7
cutaneous mechanical sensory stimulation - acetylcholine release, 423
cyclic AMP - see cAMP
cyclic GMP - see cGMP
cyclodiene - resistant house flies, 215
cytoskeletal proteins - nonenzymatic incorporation of sugars, 177

D_2 dopamine receptor - genes, structure and expression, 91
D384 astrocytoma cells, 209
denervation - effect on acetylcholinesterase, 415
depression - animal model, 29
developing brain - expression of tubulin, Tau and MAPS 2, 535
development - of fatty acid-binding protein, 237
- of mannose incorporation into proteins, 281
- of myelin, 269
- of synaptosomal taurine content, 109
N,N'-dicyclohexylcarbodiimide - effect on vesamicol binding, 83
dihydroxyphenylalanine (DOPA) - and cardiac production, 37
- increased during sympathetic stimulation, 37
dithiotreitol - inhibits metabobotropic responses of glutamate, 229
dopamine D_2 receptors - binding of ^{3}H-spiperone, 163
- molecular characterisation, 159
- of human and rat, 91
- of pituitary gland, 159
- structure, expression and genes, 91
dopamine release - measured by microdialysis, 99
- caused by calcium channel blockers, 99
dopamine transporters - labelled with ^{3}H-GBR12935, 69
- binding of ^{3}H-WIN 35,428, 581
- influence of quinolinic acid lesions, 581
dopamine uptake - effect of cocaine, 521
- in PC12 cells, 521
dopamine-dependent increase in glycoprotein fucosylation, 403

endothelial cells - acetylcholinesterase activity, 129
- subcultural and glial cells, 129
endothelin - induces phosphoinositide turnover, 293
epidural cups - use for GABA release studies, 15
exopeptidase - aminopeptidase P, 203
expression - of dopamine D_2 receptors, 91

fatty acid-binding protein - during development, 237
fluorescence digital image analysis - of intracellular Ca^{++}, 75
GABA release, 15
GABA - drug effects on metabolism and receptors, 15
galactose - nonenzymatic incorporation intoproteins, 177
ganglioside GQlb - effect inhibited by K-252b, 549
- involvement in neuritogenesis, 549
- stimulates phosphorylation, 549
GBR12935 - labels dopamine transporters, 69
- binding in brain and kidney, 69

gene - of NPY, 185
genes - of dopamine D_2 receptors, 91
genetically modified cells - grafting, 543
ginsenoside Rb_1 - actions on choline uptake, 1
glia - role in mannose incorporation into optic lobe protein,281
glial cells - affect acetylcholinesterase activity, 129
- Na^+/K^+-ATPase, 119
- subcultured with endothelial cells, 129
glucocorticoid responsive elements - in rat NPY gene, 185
glucose - nonenzymatic incorporation into proteins, 177
glutamate metabotropic effects - inhibited by dithiotreitol, 229
glutamate metabotropic responses - in synaptoneurosomes, 229
glycoprotein fucolysation - and long-term potentiation, 403
glycosignalling system, 549
grafting - of cells, 543
granule cells - localisation of Sialidase, 267
GTP-binding proteins, 409

hippocampus - release of 5-HT, 7
5-HT receptor subtypes - circadian and seasonal rhythms, 7
5-HT release, 7
5-HT - effect on NA^+/K^+-ATPase, 119
ifenprodil - effect on NMDA receptor ionophore complex, 135
in situ hybridization histochemistry - to reveal cholinergic neurones, 429
inositol phosphates - stimulated by memantine, 329
inositol triphosphate - calcium mobilisation, 259
intracellular Ca^{++} - in single blood platelets, 75
ischaemia - cell death prevented by aFGF, 397
- protection caused by acid fibroblast growth factor, 337
- effect on acetylcholine and amino acids, 243
- effects on hippocampus, 243
- intracellular calcium elevation, 337

kainic acid - effect on cholinergic markers, 447
K-252b - inhibitor of ganglioside GQlb effects, 549

learning - involvement of α-tubulin immunoreactivity, 343
lithium treatment - effect on transport of α-methyl-L-tryptophan, 513
- effect on transport of tryptophan, 513
Loligo peali - phospholipase A_2 and acetyltransferase activities in axoplasm, 563
long-term potentiation - increases protein synthesis and glycoprotein fucosylation, 403

malnourishment - influence on phospholipid incorporation into oligodendroglial cells, 287
malnutrition - influence on tubulin, 595
MAPS - in developing brain, 535
memantine - stimulates inositol phosphates and antagonises NMDA effects, 329
membrane anistoropy - circadian and seasonal rhythms, 7
metabotropic responses of glutamate -inhibited by dithiotreitol, 229
metallothionein - mRNA and synthesis, 555
- synthesis, 555
- effect of different alcohols, 555
methylation - of phospholipid, 109
α-methyl-L-tryptophan - transport across blood/brain barrier, 513
N-methyl-D-aspartate (NMDA) complex - effect of ifenprodil, 135
NMDA-induced destruction of neurones - nullified by memantine, 329
microdialysis - of dopamine release, 99
microtubule associated protein 2 - see MAPS 2,535
mRNA - of metallothionein, 555
- of protein kinase C, 503
- to tubulin, Tau and MAPS 2, 537
muscarinic - receptor binding, 313
muscarinic receptor - mediated catecholamine release, 259
muscle cell line, G8-1 - production of nerve growth factor, 251
myelin development - effect of undernourishment, 269
myelin isolation - by flotation technique, 171
myelin isolation - by sedimentation technique, 171

Na^+/K^+-ATPase - in glial cells, 119
Na+/K^+-ATPase - influenced by 5-HT, 119
nerve growth factor - modulates neuroplasticity, 543
- produced in muscle cell line, G8-1, 251
nerve growth factor-like immunoreactivity, 455
nerve growth factor-like molecules - released from astrocytes, 455
neuritogenesis - promoted by ganglioside GQlb, 549
neuropeptide Y gene, 185
- glucocorticoid responsive elements, 185
neuropeptide Y receptors - autoradiography, 45
neuropeptide Y (NPY) - in the CNS - 185
- chloramphenicol acetyltransferase assay, 185
[Leu^{31}-Pro^{34}]neuropeptide Y - identifies a subtype of neuropeptide Y receptors, 45
neuroplasticity - of NGF, 543
neuroprotection - involvement of acid fibroblast growth factor, 337
neurotransmitter release - in an animal model of depression, 24
- in vitro, 29

'H-NMR spectroscopy, 375
^{31}P-NMR spectroscopy, 375
nonenzymatic - incorporation of sugars into proteins, 177
noradrenaline - turnover, 37

oligodendroglial cells - phospholipid composition, 287
optic lobe protein - incorporation of mannose, 281

passive avoidance learning - in chick, 343
peptidylglycine-amidating monooxygenase (PAM), 153
pH - intracellular level in cortex slices, 375
phosphatidic acid - distribution and effect of age, 223
- formation in broken cells preparations, 223

phosphoinositide turnover - induced by bradykinin, 573
- induced by endothelin, 293
phosphoinositide turnover - induced by bradykinin, 573
- induced by endothelin, 293
phospholipase A_2 activity - in squid axoplasm, 563
phospholipid methylation, 109
phospholipid - composition of oligodendroglial cells, 287
pirenzepine binding, 313
pituitary gland - dopamine D_2 receptors, 159
platelets - measurements of intracellular Ca^{++}, 75
polyphosphoinositide - formation in broken cell preparation, 223
polyribosome-cytomatrix complexes - islated from brain, 21
potassium chloride - inhibits endothelin-induced stimulation of inositol phosphates, 293
poyphosphoinositide - distribution and effect of age, 223
prostaglandin D_2 - in spinal cord and meninges, 585
prostaglandin E_2 - in spinal cord and meninges, 585
prostaglandin synthesis - in Alzheimer's disease, 197
prostanoid - unusual type in spinal cord and meninges, 585
protease activities - in retina, 527
protein kinase C - activated by bradykinin, 573
- different subspecies, 499
- in different subspecies, 499
- localisation, 499
- mRNAs, 503
protein synthesis - and long-term potentiation, 403

QNB binding, 313
quantitative autoradiography - of NPY receptors, 58
quinolinic acid lesions - effect on ^{3}H-WIN 35,428 binding, 581
quinolinic acid - effect on dopamine transporter, 581

retina - protease activities, 527

salivary glands - PAM activity, 153
sciatic nerve transection - cholinergic receptors, 313
seasonal rhythms - of 5-HT receptors, 7
seasonal rhythms - of membrane anistoropy, 7
sensory stimulation - acetylcholine release, 423
serum - influence on mannose incorpoation into proteins, 281
sialidase - in cultured granule cells, 367
- subcellular localisation, 367
somatosensory cortex - cholinergic receptors, 313
spiperone binding - to D_2 dopamine receptors, 160
subspecies - of protein kinase C, 499
sympathetic stimulation - elevates cardiac DOPA levels, 37
synaptic vesicles - acetylcholine transport, 83
synaptoneurosomes - glutamate metabotropic responses, 229
synaptosomal content - of taurine, 109
synaptosomes - from developing rat, 109

tau - in developing brain, 535
taurine content - and phospholipid methylation, 109
- of synaptosomes, 109
thrombin - and rise in intracellular Ca^{++}, 75
transporter - of dopamine, 581
trimethyltin - behavioural effects, 351
- biochemical effect, 351
- histological effects, 351
- induces brain damage, 351
α-tubulin immunoreactivity - in learning, 343
tubulin - in developing brain, 535
- influenced by malnutrition, 595
tyrosine hydroxylase substrates, 191
tyrosine hydroxylase - inhibitors, 191

undernourishment - and retardation of brain development, 269

vesamicol bindings - effect of N,N'-dicyclohexylcarbodiimide, 83
vesamicol -an inhibitor of acetylcholine transport, 83

Xenopus laevis oocytes - expression of aromatic L-amino acid decarboxylase, 275

^{3}H-WIN 35,428 binding - to dopamine transporter, 581

TYPESET IN GREAT BRITAIN BY BPCC-AUP GLASGOW LTD. PRINTED BY BPCC-AUP ABERDEEN LTD
